

Copy code

```
on:
  push:
    branches:
      - main

jobs:
  build:
    runs-on: ubuntu-latest
    steps:
      - name: Checkout code
        uses: actions/checkout@v3

      - name: Set up Node.js
        uses: actions/setup-node@v3
        with:
          node-version: 16

      - name: Install dependencies
        run: npm install

      - name: Run tests
        run: npm test
```

This workflow runs whenever code is pushed to the `main` branch. It checks out the code, sets up Node.js, installs dependencies, and runs tests.

GitHub Actions is highly customizable and integrates seamlessly with GitHub, making it a popular choice for automating workflows in software projects.
